

Summary of APPC12

SASASO MAMIKO

Program Chair

July 19, 2013

Statistics (final)

Plenary talks	18
Invited talks	147
Oral presentation	249
Poster presentation	735
<hr/>	
Total	1149 papers

in APPC12 sessions

Contributions – 28 countries/regions

including ASEPS participants

Australia	18	Kazakhstan	1	Taiwan	73
Austria	1	Korea	69	Thailand	12
Belgium	1	Malaysia	6	Turkey	1
China	45	Mongolia	1	UK	2
France	2	Myanmar	1	USA	14
Hong Kong	3	Nepal	2	Vietnam	3
I. R of Iran	1	Philippines	4	Total	1256
India	12	Poland	1		
Indonesia	2	Singapore	5		
Italy	2	Sri Lanka	1		
Japan	972	Switzerland	1		

Contribution of young scientists and women in Physics is growing / expanding.

Physics innovation

- This conference covered the wide area of physics,
- From particle physics to condensed matter, DNA, complex systems and etc.,
- From pure physics to various application to industry, to medical field, to energy resources, even to stock market,
- From understanding of the universe to the human being.

Wider and deeper understanding

This conference aimed to provide an opportunity for wider and deeper understanding of expanding physics, for discussion between experimental and theoretical researchers.

It aimed to advance our collaboration in Asia Pacific region and with European countries.

The results will come out in future, and will be presented at next meeting, APPC13.

Proceedings

We had 521 manuscripts, and most of them were sent to editors, and then sent to reviewers.

Some of you will be asked to review articles, and to return the review results within 14 working days.

We appreciate if all invited speakers submit papers. For that purpose, we will open the submission site again on August 1.
