Computational Science at the National Science Foundation and High Order Numerical Methods

Leland M. Jameson

*The National Science Foundation, Arlington Virginia*

ljameson@nsf.gov

This presentation will consist of two parts. First of all I will discuss my own research over focusing on the high order numerical methods and the correctness of large simulations. The second part of the presentation will discuss the various activities at the NSF that involve computational science everywhere from high performance computing platforms to various research funding programs that are meant to promote various aspects of computational science.
